ADDENDUM NO. 1
DRAFT FINAL – RESTORATION PLAN, EXPORT PLANT, LIBBY, MT
April 25, 2001

This addendum to the April 20, 2001 Draft Final Restoration Plan for the four buildings located at the Export Facility in Libby, Montana is issued to amend the scope of restoration activities presented in the Plan.

Upon discussions with representatives of EPA and WR Grace, the four buildings located at the Export Facility in Libby, Montana and further described within the text of the Restoration Plan will be demolished to their foundation. These buildings are labeled; 1) the Pole Barn Building, 2) the Small Shed, 3) the Large Lumber Warehouse, and 4) the Scale Building.

Demolition activities of the four buildings will be supported by water misting to minimize dust emissions, air monitoring (perimeter, area, and OSHA), and personal protective equipment, if required during the implementation of the work.

The demolition materials will be loaded on highway certified dump trucks and transported to the Mine Site for disposal.
